

1. Introduction

1.1 Proposed System and Its Objectives

An online furniture shop that allows users to check for various furniture available at the online store and purchase online. The project consists of list of furniture products displayed in various models and designs. The user may browse through these products as per categories. If the user likes a product, he may add it to his shopping cart. Once user wishes to check out, he must register on the site first.

He can then login using same id password next time. how he may pay through a credit card or cash on delivery. Once the user makes a successful transaction he gets a copy of the shopping receipt on his email id.

Here we use visual studio code to make the entire frontend.

The middle tier or code behind model is designed in php and MySQL server as a backend to store furniture lists and inventory data.

Thus, the online furniture shopping project brings an entire furniture shop online and makes it easy for both buyer and seller to make furniture deals.

Furniture Showroom is the official web site that create a site platform independent, and with some of the furniture centre's building mutual assistance and cooperation relations, online sales. This furniture site supplies facilities to buy online basic, durable home and office furniture. This website for is created to help increase its sales as well as to acquire more customers in the furniture market.

1.2 Core Components

- **Front-end:** HTML, CSS, JavaScript, Bootstrap
- **Back-end:** PHP, MySQL
- **Server:** XAMPP Server
- **Database:** MySQL
- **Tools:** VS Code, Android Studio, MS Word
- **System Modules:** User module, Admin module, Product module, Category module, Order module, Banner/Coupon module, Report

Frontend (User Mobile Application)

- Developed in **Kotlin (Android Studio)**
- User login/registration
- Category-wise product listing
- Product details
- Add to Cart
- Order placement & payment
- Coupon application

Backend (Admin Web Panel)

Developed in **PHP**, includes:

- Category Management
- Product Management
- Banner Management
- Coupon Management
- View User
- Admin Management

- Management Orders
- Add New Admin
- Logout

1.3 Minimum and Maximum Software/Hardware Requirements

Requirement	Minimum	Recommended
OS	Windows 10	Windows 11 / Server 2019+
RAM	8 GB	16 GB
Processor	Intel i3	Intel i5/i7
Database	XAMPP	MySQL
Mobile Device	Basic smartphone	Android 12+ device
Software	Android Studio, XAMPP/WAMP, PHP, MySQL	Latest Android Studio, PHP 8+, MySQL

1.4 Advantages and Limitations of the Proposed System

Advantages

- Real-time product updates
- Easy-to-use UI
- Secure user authentication
- Fast checkout and payment
- Admin has full control
- Mobile convenience

Limitations

- Requires strong internet access
- Server downtime affects shopping
- AR-based product visualization not integrated
- Limited advanced security features
- Dependency on digital payment trust

2. Requirement Determination & Analysis

2.1 Requirement Determination

Functional Requirements

- User login/registration
- View categories & products
- Add product to cart
- Place order
- Apply coupon
- Admin CRUD operations
- Order management

Non-functional Requirements

- Security (API authentication)
- Fast response time
- User-friendly UI
- Data consistency
- Maintainability

2.2 Targeted Users

The proposed system FurniZone, consisting of a mobile application (user panel) and a web-based admin panel, is designed to serve the following targeted user groups:

1. General Customers

These are the primary users of the mobile application.

They include:

- Individuals looking to browse home furniture online
- Customers who want to purchase furniture using an easy mobile interface
- People looking for discounts through coupons
- Users who prefer app-based shopping with secure checkout and payment options

2. Admin Users

These users manage the backend system through the web-based admin panel.

They include:

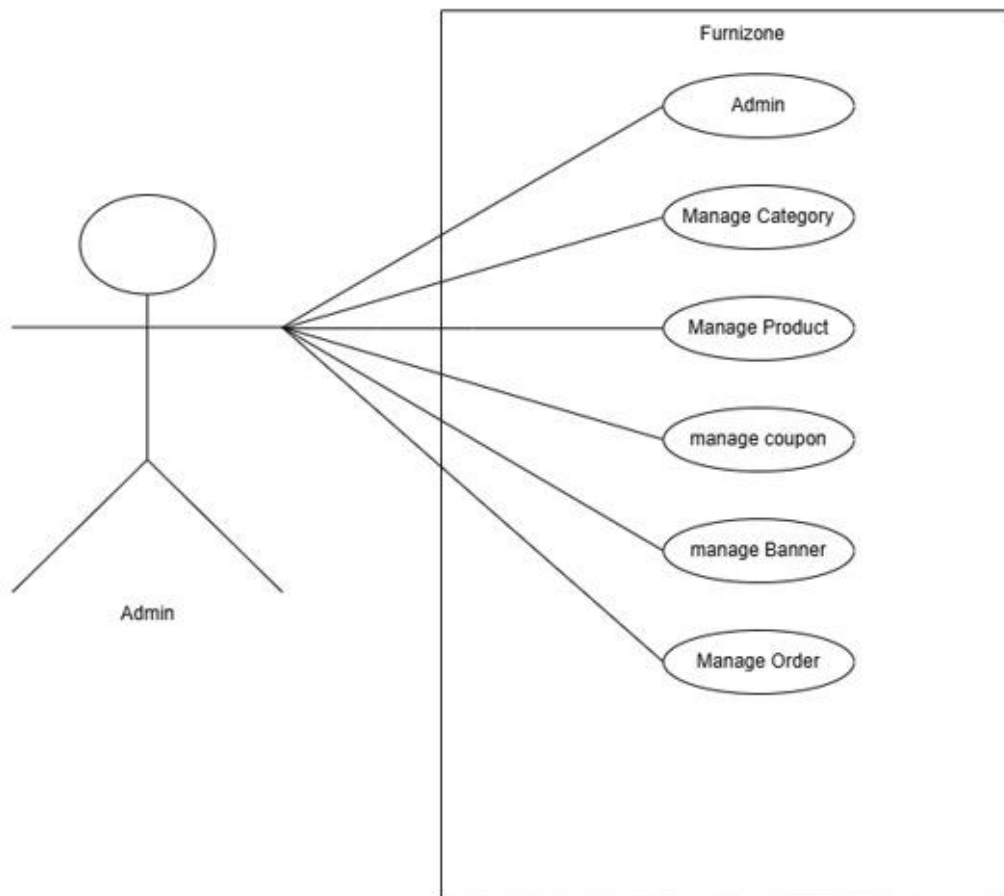

- Manage categories & products
- Upload banners
- Create coupons
- Manage Admin

3. System Design

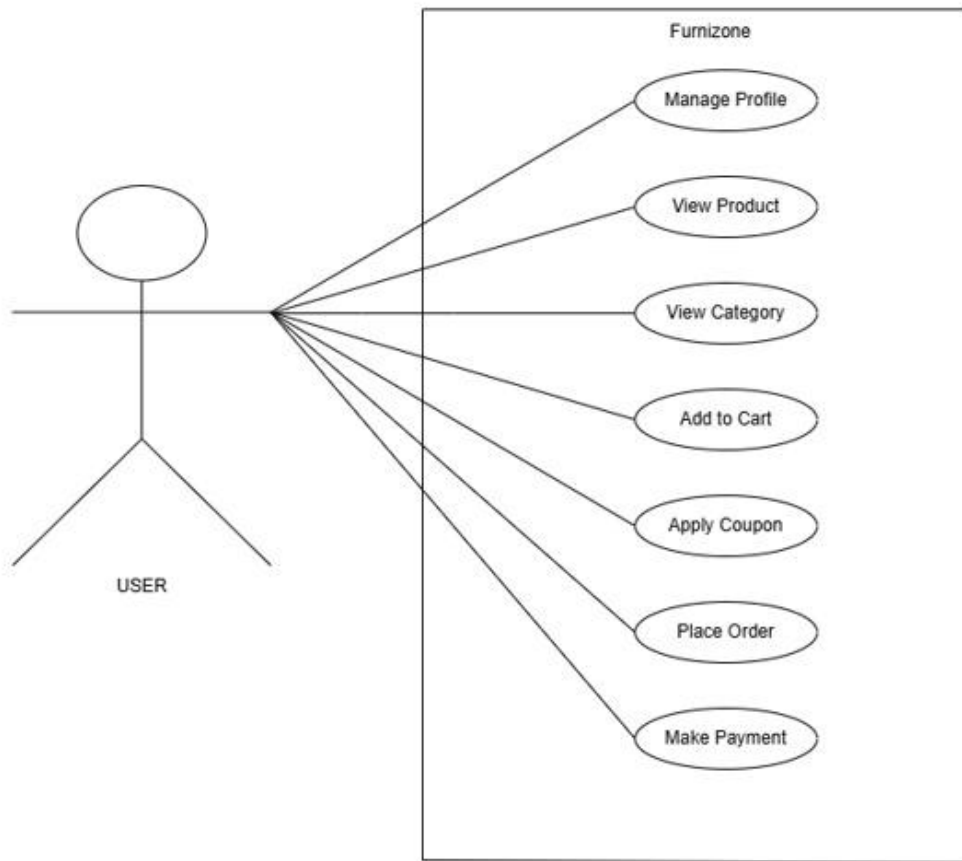

3.1 Use Case Diagram

- Users: Admin, User

3.5 Data Dictionary

Table Name : tbl_admin

Column name	Data type	Size	Constraint	Description
admin_id	Int	11	Primary Key	Used to uniquely identify.
admin_name	Varchar	50	Not Null	Specify the name of admin.
admin_email	Varchar	50	Not Null	Specify the email of admin.
admin_mobile	Varchar	10	Not Null	Specify the mobile number of admin.
admin_password	Varchar	14	Not Null	Specify the password of admin.

Table Name : tbl_user

Column name	Data type	Size	Constraint	Description
user_id	Int	11	Primary Key	Used to uniquely identify.
user_name	Varchar	50	Not Null	Specify the name of user.
user_email	Varchar	50	Not Null	Specify the email of user.
user_password	Varchar	100	Not Null	Specify the password of user.
user_phone	Varchar	10	Not Null	Specify the phone of user.
User_pic	Varchar	100	Not Null	Specify the pic of user.

Table Name : tbl_category

Column name	Data type	Size	Constraint	Description
cat_id	Int	11	Primary Key	Used to uniquely identify.
cat_name	Varchar	50	Not Null	Specify the category name of category.
cat_pic1	Varchar	100	Not Null	Specify the pic 1 of category.
cat_pic2	Varchar	100	Not Null	Specify the pic 2 of category.

Table Name : tbl_banner

Column name	Data type	Size	Constraint	Description
ban_id	Int	11	Primary Key	Used to uniquely identify.
ban_title	Varchar	20	Not Null	Specify the banner title of banner.
ban_img	Varchar	50	Not Null	Specify the banner image of banner
status	Varchar	10	Not Null	Specify the status of banner.

Table Name : tbl_product

Column name	Data type	Size	Constraint	Description
product_id	Int	11	Primary Key	Used to uniquely identify.
product_name	Varchar	50	Not Null	Specify the Product name.
product_color	Varchar	20	Not Null	Specify the Product color.
product_price	Varchar	10	Not Null	Specify the Product price.
product_discount	Varchar	10	Not Null	Specify the Product discount.
product_description	Varchar	50	Not Null	Specify the Product description.
product_dimention	Varchar	20	Not Null	Specify the Product dimension.
product_weight	Varchar	20	Not Null	Specify the Product weight.
product_primary_material	Varchar	50	Not Null	Specify the Product primary material.
product_warranty	Varchar	20	Not Null	Specify the Product warranty.
product_rating	Varchar	10	Not Null	Specify the product rating.
product_specification	Varchar	100	Not Null	Specify the Product specification.
product_pic1	Varchar	50	Not Null	Specify the Product pic1.
product_pic2	Varchar	50	Not Null	Specify the Product pic2.
product_pic3	Varchar	50	Not Null	Specify the Product pic3.
product_pic4	Varchar	50	Not Null	Specify the Product pic4.
cat_id	Varchar	10	Not Null	Specify the category id.

Table Name : tbl_coupon

Column name	Data type	Size	Constraint	Description
coupon_id	Int	11	Primary Key	Used to uniquely identify.
coupon_title	Varchar	20	Not Null	Specify the coupon title of coupon.
coupon_code	Varchar	10	Not Null	Specify the coupon code of coupon.
coupon_description	Varchar	20	Not Null	Specify the coupon description of coupon.
coupon_img	Varchar	50	Not Null	Specify the coupon image of coupon.
coupon_discount	INT	10	Not Null	Specify the coupon discount of coupon.

Table Name : tbl_order

Column name	Data type	Size	Constraint	Description
id	Int	11	Primary Key	Used to uniquely identify.
uid	Int	11	Not Null	Specify the user id of order.
pid	Int	11	Not Null	Specify the pid of order.
pname	Varchar	50	Not Null	Specify the pname of order.
ppic	Varchar	50	Not Null	Specify the ppic of order.
date	Varchar	15	Not Null	Specify the date of order.
time	Varchar	20	Not Null	Specify the time of order.
amount	Decimal	10	Not Null	Specify the amount of order.
total_amount	Decimal	10	Not Null	Specify the total amount of order.
quantity	Int	11	Not Null	Specify the quantity of order.
status	Int	11	Not Null	Specify the status of order.
is_wishlist	Tinyint	1	Not Null	Specify the wishlist of order.
state	Int	11	Not Null	Specify the state of order.
address	Varchar	100	Not Null	Specify the address of delivery.

Table Name : tbl_addresses

Column Name	Data Type	Size	Constraint	Description
Id	Int	11	Primary Key, Auto_Increment, Not Null	Unique Identifier For Each Address Record.
User_Id	Int	11	Not Null	Id Of The User To Whom The Address Belongs.
Full_Name	Varchar	100	Not Null	Full Name Of The User For Delivery.
Phone	Varchar	15	Not Null	Phone Number Of The User.
Pincode	Varchar	10	Not Null	Postal/Zip Code Of The Delivery Location.
House_No	Varchar	100	Not Null	House Or Building Number/Details.
Area	Varchar	100	Not Null	Area Or Locality Of The Address.
Landmark	Varchar	100	Not Null	Nearby Landmark For Easier Identification.
City	Varchar	50	Not Null	City Of The Delivery Address.
State	Varchar	50	Not Null	State Or Region Of The Address.
Address_Type	Enum('Home', 'Work', 'Other')	—	Not Null, Default 'Home'	Type Of The Address.
Is_Default	Tinyint	1	Not Null, Default 0	Specifies Whether This Is The Default Address (1 = Yes, 0 = No).
Created_At	Timestamp	—	Not Null, Default Current_Timestamp()	Date & Time When The Address Record Was Created.

4. Agile Documentation:

AGILE PROJECT CHARTER	
GENERAL PROJECT INFORMATION	
PROJECT NAME	“FurniZone”
PROJECT BY	Sahil Dharani Kishan Pancholi Siya Sachan Vidhi Sorathia
START DATE	15/7/2025
END DATE	18/11/2025
PROJECT DETAILS	
VISION	The vision of FurniZone is to create a modern, user-friendly, and reliable online furniture marketplace that transforms the way customers discover, evaluate, and purchase furniture. FurniZone aims to bridge the gap between traditional furniture shopping and digital convenience by offering a seamless platform where users can browse a wide variety of high-quality products, compare options, customize selections, and make secure purchases from the comfort of their homes.
OBJECTIVES	To develop a user-friendly e-commerce platform that enables customers to browse, search, and purchase furniture easily. To ensure secure and efficient online transactions through integrated payment gateways. To provide detailed product information such as images, specifications, and pricing for better decision-making.
KEY STAKEHOLDER	a. Customers (End Users) b. Admin / System Administrator
APPROACHES	a. System Development Approach b. Design Approach. c. Implementation Approach d. Testing Approach e. Deployment Approach

4.2 Agile Roadmap / Schedule

Sprint Name	Duration	Goals
Sprint 1 – Requirement & UI/UX Planning	15/07/2025 – 28/07/2025	• Finalize requirements• Prepare app & admin panel UI flow• Create wireframes• Define backend API structure• Environment setup
Sprint 2 – Backend Foundation (PHP + MySQL)	29/07/2025 – 11/08/2025	• Design database schema• Build login/category/product APIs• Implement admin login• Category & product CRUD
Sprint 3 – Mobile App Core Development (Kotlin)	12/08/2025 – 25/08/2025	• User login/registration• Category list & product list integration• Product details screen• Connect mobile app with backend APIs
Sprint 4 – Cart, Checkout & Payment Module	26/08/2025 – 08/09/2025	• Add-to-cart system• Cart view & update• Checkout flow• Payment integration• Coupon application
Sprint 5 – Complete Admin Panel Functionality	09/09/2025 – 22/09/2025	• Banner management• Coupon management• Orders overview• Add/remove admin• Validate all admin CRUD modules
Sprint 6 – Integration, Testing & Bug Fixing	23/09/2025 – 06/10/2025	• Integrate APIs with app• Fix UI bugs• Resolve admin panel issues• Conduct full integration testing• Performance optimization
Sprint 7 – Final Deployment & Documentation	07/10/2025 – 20/10/2025	• Final app build• Host backend on server• Prepare full documentation• Final testing and UAT• Submission-ready delivery

4.3 Agile Project Plan

Task Name	Start Date	End Date	Days
Sprint 1: Project Setup	15/07/2025	28/07/2025	14
- Requirement Gathering	15/07/2025	18/07/2025	4
- Set up GitHub repo & environment	19/07/2025	20/07/2025	2
- Design Database Schema	21/07/2025	24/07/2025	4
- Basic Project Setup (Frameworks)	25/07/2025	28/07/2025	4
Sprint 2: Backend Development	29/07/2025	11/08/2025	14
- Backend Setup (PHP + MySQL)	29/07/2025	31/07/2025	3
- Category API Development	01/08/2025	03/08/2025	3
- Product API Development	04/08/2025	07/08/2025	4
- Admin Login API	08/08/2025	11/08/2025	4
Sprint 3: Mobile App Core Development	12/08/2025	25/08/2025	14
- Mobile App Setup (Kotlin)	12/08/2025	14/08/2025	3
- Category Screen Development	15/08/2025	18/08/2025	4
- Product List Screen	19/08/2025	21/08/2025	3
- Product Details + API Integration	22/08/2025	25/08/2025	4
Sprint 4: Cart, Checkout & Payment	26/08/2025	08/09/2025	14
- Cart Module Development	26/08/2025	30/08/2025	5
- Checkout Flow Development	31/08/2025	12/09/2025	3
- Address & Order Summary	03/09/2025	04/09/2025	2
- Payment Integration	05/09/2025	08/09/2025	4

Sprint 5: Admin Panel Features	09/09/2025	22/09/2025	14
- Banner Management	09/09/2025	11/09/2025	3
- Coupon Management	12/09/2025	14/09/2025	3
- Orders Module	15/09/2025	17/09/2025	3
- Manage Admin Users	18/09/2025	22/09/2025	5
Sprint 6: Testing & Integration	23/09/2025	06/10/2025	14
- Full Testing (Unit + Integration)	23/09/2025	26/09/2025	4
- Bug Fixing & Optimizations	27/09/2025	02/10/2025	6
- Mobile App Testing	03/10/2025	06/10/2025	4
Sprint 7: Deployment	07/10/2025	20/10/2025	14
-Final App Build	07/10/2025	10/10/2025	4
- Backend Deployment	11/10/2025	12/10/2025	2

4.4 Agile User Story (Minimum 3 Tasks)

User Story	As a...	I want to...
User Story 1: Product Browsing	user	view products by category so that I can easily find items.
User Story 2: Add to Cart	user	add items to my cart so that I can buy later.
User Story 3: Admin Product Management	admin	I want to add/update/delete products so that users see correct data.

4.5 Agile Release Plan

Sprint Name	Start Date	End Date	Days	Status
Sprint 1: Project Setup	15/07/2025	28/07/2025	14	Release
Sprint 2: Backend Development	29/07/2025	11/08/2025	14	Release
Sprint 3: Mobile App Core Development	12/08/2025	25/08/2025	14	Release
Sprint 4: Cart, Checkout & Payment	26/08/2025	08/09/2025	12	Release
Sprint 5: Admin Panel Features	09/09/2025	22/09/2025	25	Release
Sprint 6: Testing & Integration	23/09/2025	06/10/2025	15	Release
Sprint 7: Deployment	07/10/2025	20/10/2025	4	Release

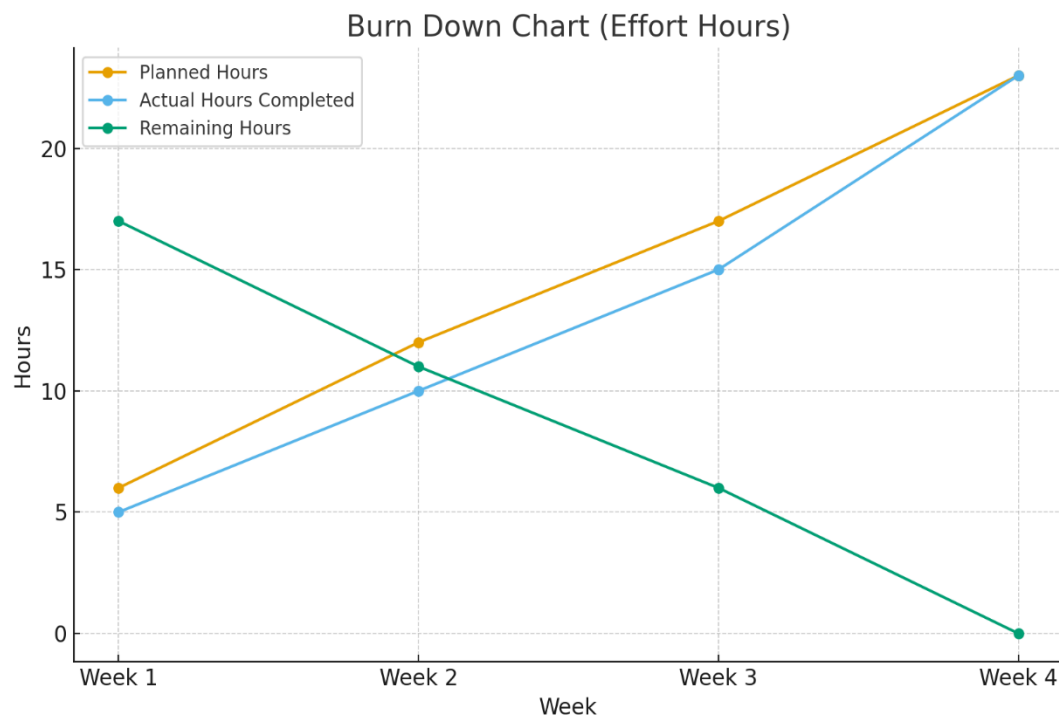

4.6 Agile Sprint Backlog

Task Name	Start Date	End Date	Days
Project Documentation	21/10/2025	28/10/2025	8
Project Updates	29/10/2025	03/11/2025	6
Reports for Project	04/11/2025	16/11/2025	12

4.7 Agile Test Plan

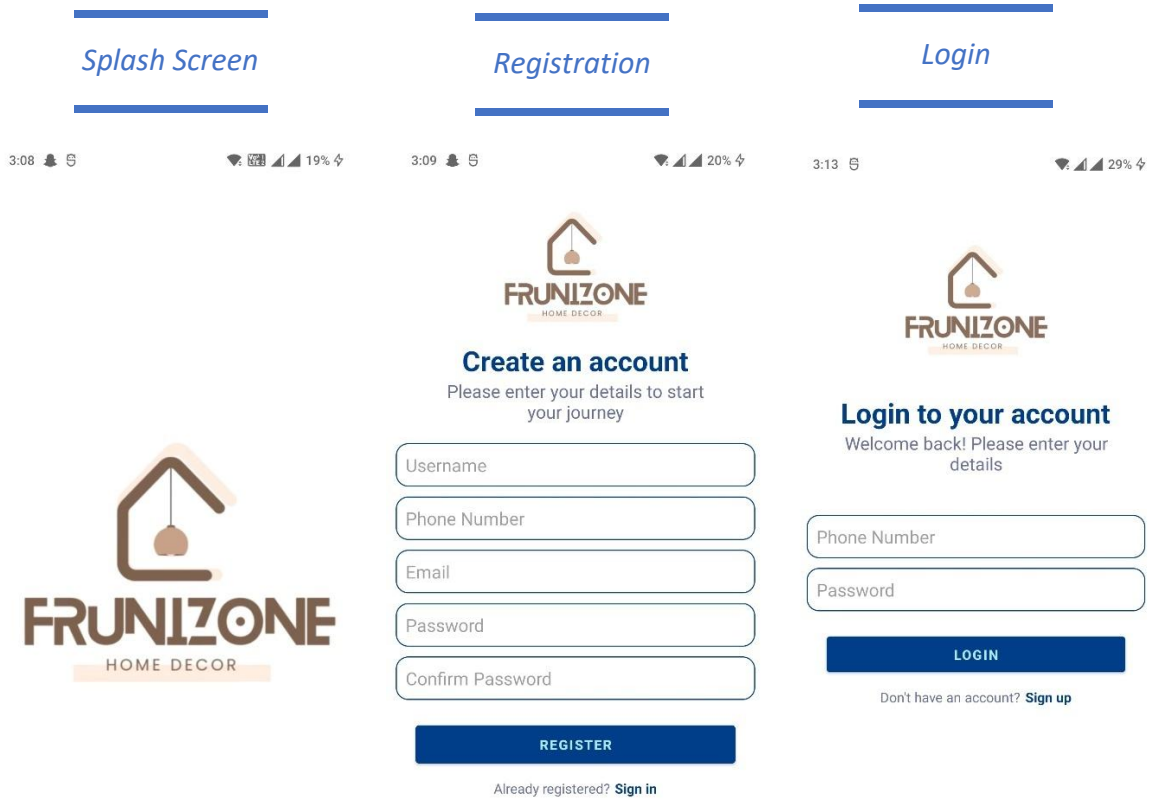

Test	Date	Action	Expected Result	Actual Result	Pass
Login Functionality Test	24/09/2025	Enter valid email & password	User should successfully log into the app	Works as expected	Pass
Category Loading Test	25/09/2025	Open app → Navigate to category section	All categories should load from API	Categories displayed correctly	Pass
Product Display Test	26/09/2025	Click any category	All products under that category should be shown	Products loaded correctly	Pass
Add to Cart Test	27/09/2025	Press "Add to Cart" on a product	Product should be added to cart	Cart updated successfully	Pass
Cart Quantity Update Test	28/09/2025	Increase/decrease quantity	Cart total should update accordingly	Updated correctly	Pass
Checkout Test	29/09/2025	Go to checkout page	User should see delivery address & summary	Displayed correctly	Pass
Payment Gateway Test	30/09/2025	Proceed to payment	Payment should be completed successfully	Completed successfully	Pass
Admin Login Test	01/10/2025	Login with admin credentials	Admin dashboard should load	Dashboard loads successfully	Pass
Product Module Test (Admin)	02/10/2025	Add/edit/delete product	Product should update in database	Works correctly	Pass
Order Tracking Test	03/10/2025	Place an order → Check order status	Status should update in real-time	Working as expected	Pass

Add Coupon

The screenshot shows the FurniZone dashboard with a sidebar menu on the left containing 'Dashboard', 'Category', 'Product', 'Banner', 'Coupon', 'Users', 'Admin', and 'Total Order'. The main content area displays a 'Coupen Table' with columns for 'Sr. No.', 'Coupen ID', 'img', 'Coupen Discount', 'Delete', and 'Update'. A modal window titled 'ADD COUPEN' is open, featuring a search bar at the top right. The form fields include: 'Coupen Title' (with a document icon), 'Coupen Code' (with a number icon), 'Coupen Description' (with a speech bubble icon), a file upload section with a 'Choose File' button and 'No file chosen' text, and 'Coupen Discount' (with a percentage icon). At the bottom of the modal are 'close' and 'Add' buttons. The background table shows two entries: one with ID 9 and another with ID 12.

Sr. No.	Coupen ID	img	Coupen Discount	Delete	Update
1	9		20		
2	12		50		

Update Coupon

The screenshot shows the 'Update Coupon' form in the FurniZone dashboard. The sidebar menu is the same as in the previous image. The main content area has a search bar and a user profile 'sahil'. The form fields are: 'First Order Offer' (text), 'flat 20%' (text), 'On any Product' (text), a file upload section with a 'Choose File' button and 'No file chosen' text, and '20' (text). At the bottom are 'Back' and 'Save changes' buttons. The footer shows '© FurniZone 2025'.

6. Proposed Enhancements

Future upgrades:

- Add delivery partner module
- Add product reviews & ratings
- Add wishlist
- Add AR-based furniture preview
- Multi-language support
- iOS version of the app

7. Conclusion

FurniZone successfully integrates **mobile app development** with **web-based backend management**. The project demonstrates practical knowledge of Android Kotlin, PHP backend, MySQL database, and API-based integration. It provides a usable and scalable solution for online furniture shopping.
